

## SLIME RECIPE USING CONTACT SOLUTION

### Ingredients

½ cup glue, clear or white (approx 1- 5oz bottle)

½ teaspoon baking soda

Food coloring or liquid water color

(Essential oils or spices, optional)

1-2 Tablespoons contact solution (3oz travel size works well)

### Optional

Essential oils or spices

Glitter

Baby Oil

Pour bottle of glue into a medium sized bowl. Add baking soda and food coloring. Stir to combine. If using scent or glitter, add now. Stir in contact solution. If still sticky, add a bit more contact solution. Don't add too much or slime will turn hard. Slime will be ready when it sticks to itself and not the sides of the bowl.
